

# s202018021\_02-03-ex1

---

Fu, Ziyu

## 1. Instruction to compile the code

After using the `cd` (change directory) command to navigate to the correct working directory, use these following commands to compile the code:

```
% gcc 02-03-ex1.c  
% ./a.out
```

## 2. Brief review of the code

This is a very simple piece of logic, where the program simply prints out `argc` and `argv`.

## 3. Result of execution

```
% gcc 02-03-ex1.c  
  
% ./a.out  
There are 1 arguments.  
./a.out  
  
% ./a.out aaa bbb ccc  
There are 4 arguments.  
./a.out  
aaa  
bbb  
ccc
```

## 4. Explanation for extra files

N/A
